Change time on lock screen to 24h format

Navigate to the following directory:

```
cd /usr/share/plasma/look-and-
feel/org.kde.breeze.desktop/contents/components
```

Then edit `Clock.qml`:

```
sudo nano Clock.qml
```

Find the following line: `text: Qt.formatTime(timeSource.data[“Local”][“DateTime”])`

And edit this line to the following:

```
text: Qt.formatTime(timeSource.data["Local"]["DateTime"], "hh:mm:ss")
```

Remove `:ss` to just display hour and minute. Finally reboot.
