

Discord Installation via SNAP

Install Discord on Ubuntu via snap

Just use the following command:

```
sudo snap install discord
```

Fix Discord (snap) spamming syslog

If Discord is spamming your syslog on Ubuntu or Debian and you installed it via snap, try this:

```
sudo snap connect discord:system-observe :system-observe
```

This is required when Discord should be able to see which programs are running to display them in your status. Source: github.com/snapcrafters/discord
