

# Run command with systemd periodically

If you wish to run a command periodically with systemd create a service with the following content:

```
[Unit]
Description=Autorun command
After=network.target network-online.target

[Service]
RestartSec=30
Restart=always
User=<user>
ExecStart=/command/to/be/run

[Install]
WantedBy=multi-user.target
```

Edit RestartSec for the time (in seconds) between each run.
