

# Zyzoneix

Hello, my name is Zyzoneix . I'm a former student of Brecht Schule and currently working in the IT department of it.

As convinced Linux enthusiast I see it as my duty to maintain this wiki to give something back to the community.

My [GitHub](#) can be found here: [github.com/zyzoneix](https://github.com/zyzoneix). Often I write some cool short scripts which aren't worth for a repository, therefore I created my virtual code 'attic', it can be found [here](#).

## repo.zyzoneix.net

I am also hosting a Debian repository under [repo.zyzoneix.net](https://repo.zyzoneix.net) for several fun projects (Architectures: amd64, arm64 and armhf). Currently I am trying to bring proxmox back to the ARM64 architecture after the Pimox project on [GitHub](#) is some releases behind. Check out my repo to stay up to date.

You can add my repository with this commands (requires curl and gpg installed): Add repository:

```
curl -sS https://repo.zyzoneix.net/ReleaseKey.gpg | gpg --dearmor | sudo tee /usr/share/keyrings/repo.zyzoneix.net.gpg > /dev/null
```

And:

```
echo "deb [signed-by=/usr/share/keyrings/repo.zyzoneix.net.gpg] https://repo.zyzoneix.net/ stable main" | sudo tee /etc/apt/sources.list.d/repo.zyzoneix.net.list
```

---

## Public Blockchain Nodes

Additionally I am running public blockchain nodes of [Chia](#) and forks of it, they can either be access through `node.zyzoneix.net` or `node.xerberos.de`:

Blockchain	Port (TCP)
Chia Network	8444
HDDCoin Network	28444
STAI Network	1999
BPX-V3 Network	30303 / 6201

*The crossed-through networks are currently not running.*

## Pin list

Zyzonix's personal pinboard.

*[Different uses of the directories in Linux root directory tails.net](#)*
