

Zyzoneix

Hello, my name is Zyzoneix 🤗. I'm a former student of Brecht Schule and currently working in the IT department of it.

As convinced Linux enthusiast I see it as my duty to maintain this wiki to give anything back to the community.

My [GitHub](https://github.com/zyzoneix) can be found here: github.com/zyzoneix

repo.zyzoneix.net

I am also hosting a Debian repository under repo.zyzoneix.net for several fun projects (Architectures: amd64, arm64 and armhf). Currently I am trying to bring proxmox back to the ARM64 architecture after the Pimox project on [GitHub](https://github.com) is some releases behind. Check out my repo to stay up to date.

You can add my repository with this commands (requires curl installed): Add repository:

```
curl -sS https://repo.zyzoneix.net/ReleaseKey.gpg | gpg --dearmor | sudo tee /usr/share/keyrings/repo.zyzoneix.net.gpg > /dev/null
```

And:

```
echo "deb [signed-by=/usr/share/keyrings/repo.zyzoneix.net.gpg] https://repo.zyzoneix.net/ stable main" | sudo tee /etc/apt/sources.list.d/repo.zyzoneix.net.list
```

Additionally I am running four public blockchain nodes of [Chia](https://github.com) and forks of it, they can either be access through `node.zyzoneix.net` or `node.xerberos.de`:

Blockchain	Port (TCP)
Chia Network	8444
HDDCoin Network	28444
STAI Network	1999
BPX V3 Network	30303 / 6201
