Zyzonix

Hello, my name is Zyzonix 😉. I'm a former student of Brecht Schule and currently working in the IT department of it.

As convinced Linux enthusiast I see it as my duty to maintain this wiki to give anything back to the community.

My GitHub can be found here: github.com/zyzonix. Often I write some cool short scripts which aren't worth for a repository, therefore I created my 'attic', it can be found here.

repo.zyzonix.net

I am also hosting a Debian repository under repo.zyzonix.net for several fun projects (Architectures: amd64,arm64 and armhf). Currently I am trying to bring proxmox back to the ARM64 architecture after the Pimox project on GitHub is some releases behind. Check out my repo to stay up to date.

You can add my repository with this commands (requires curl installed): Add repository:

```
curl -sS https://repo.zyzonix.net/ReleaseKey.gpg | gpg --dearmor | sudo tee
/usr/share/keyrings/repo.zyzonix.net.gpg > /dev/null
```

And:

```
echo "deb [signed-by=/usr/share/keyrings/repo.zyzonix.net.gpg]
https://repo.zyzonix.net/ stable main" | sudo tee
/etc/apt/sources.list.d/repo.zyzonix.net.list
```

Public Blockchain Nodes

Additionally I am running four public blockchain nodes of Chia and forks of it, they can either be access through node.zyzonix.net or node.xerberos.de:

Blockchain	Port (TCP)
Chia Network	8444
HDDCoin Network	28444
STAI Network	1999
BPX V3 Network	30303 / 6201

Pin list

Zyzonix's personal pinboard.

Different uses of the directories in Linux root directory
