

# Run remote-signed PowerShell Scripts

Windows blocks the execution of remote signed PowerShell scripts by default. If your execution policy still has this setting, you might see this error message:

```
C:\Users\test-user\Downloads\Install.ps1 is not digitally signed. You cannot
run this script on the current system. For more
information about running scripts and setting execution policy, see
about_Execution_Policies at
https://go.microsoft.com/fwlink/?LinkID=135170.
At line:1 char:1
+ .\Install.ps1
+ ~~~~~
+ CategoryInfo          : SecurityError: (:) [], PSSecurityException
+ FullyQualifiedErrorId : UnauthorizedAccess
```

Just run the following command as Administrator within a PowerShell console:

```
set-executionpolicy remotesigned
```
